UNIVERSITY OF PITTSBURGH MEDICAL CENTER

Gastrointestinal Pathology Fellowship

Description: Our GI Pathology Center of Excellence (COE) training program provides core clinical diagnostic training in disorders of the luminal GI tract and pancreas. Training is also provided in both hepatic pathology (through our Transplant & Hepatic COE) and molecular pathology (through our Molecular Anatomic Pathology Laboratory). Our program now offers an option for independent case sign-out. For candidates who are hired as junior faculty members (Clinical Instructors), the 1st half of the year consists of traditional fellowship training, while in the 2nd half of the year, the Clinical Instructor signs out GI biopsies and GI resections under the guidance of a GI pathology attending. For candidates who require PGY-level training, we offer a full year of traditional fellowship training in our GME-approved Special Institutional Education Program. The GI pathology fellow is encouraged to perform research and has the opportunity to attend and contribute to numerous didactic and clinical conferences. Six GI pathologists and additional general surgical pathologists with subspecialty interest in GI provide clinical service, contribute to the research program of the GI section, and support the GI Pathology training program.

Requirements: Completion of AP or AP/CP residency and all 3 steps of USMLE.

Stipends: Commensurate with the level of postgraduate training in Pathology.

Staff: Alyssa M. Krasinskas MD, Fellowship Director; **Jon Davison** MD; **Douglas Hartman** MD; **Shih-Fan Kuan** MD, PhD; **Sarah Navina** MD; **Reet Pai** MD; **Aatur Singhi** MD.
