**ALBERT EINSTEIN COLLEGE OF MEDICINE**  
**MONTEFIORE MEDICAL CENTER**  
*Cytopathology Fellowship*

**Description:** The Cytopathology Division of the Department of Pathology offers two fully approved one-year fellowship positions in cytopathology. The 1200-bed institution is the University Hospital for the Albert Einstein College of Medicine, with extensive clinical and research programs. The Cytopathology Division accessioned over 72,000 specimens last year. Approximately 85% of the specimens were in gynecologic cytology (with a high abnormal rate). Among the nongynecologic specimens there were approximately 2,700 aspiration biopsies from superficial and deep locations. The Division is staffed by six Board-certified cytopathologists. Fellows receive personal guidance and gain experience in diagnostic evaluation of all cytologic specimens with histologic correlations, hands-on performance of aspiration biopsies of palpable lesions and evaluation of deep aspirates. Fellows are expected to participate in the Division's strong research programs which include immunocytochemistry, in situ hybridization, and molecular genetics.

**Requirements:** MD degree or equivalent, and Certification or Board eligibility in anatomic pathology, or anatomic and clinical pathology.

**Stipends:** Dependent upon level of training.

**Applications:** Send requests for applications 19 months prior to fellowship beginning to: Samer N. Khader, MD, Associate Program Director, Montefiore Medical Center, Department of Pathology, 111 East 210th Street, Central Building, 3rd Floor, Bronx, NY 10467
