
UNIVERSITY OF CALIFORNIA, LOS ANGELES

Molecular Genetic Pathology Fellowship

Description: The Department of Pathology & Laboratory Medicine offers a one-year accredited fellowship in Molecular Genetic Pathology that provides intensive training in all aspects of molecular diagnostics, including DNA and RNA analysis in cancers, genetic disorders, infectious disease, and identity testing. The fellow will learn diagnostic skills during exposure to internal cases as well as a large number of referral cases sent to UCLA for consultations. The fellow interacts with Pathology and Laboratory Medicine residents, as well as fellows, residents and faculty in the Medical Genetics and Hematology-Oncology services, among others. The fellow participates in teaching, conferences, and genetics clinics. Fellows are encouraged to develop scholarly or research activities. One fellowship position is offered each academic year.

Requirements: Applicants must be BE/BC in anatomic and/or clinical pathology or medical genetics. A California medical license is required.

Types and Numbers of Appointments: There is one fellow per academic year.

Stipends: Support is commensurate with the candidate's level of training.

Applications: Applications should be submitted 1 1/2 years prior to desired fellowship or by February 1st of the year preceding the fellowship; although applications are considered on a rolling basis. Please contact Fellowship Coordinator (Ms. Annetta Pierro) for list of requirements and application. In addition, submit curriculum vitae and three letters of recommendation to Wayne W. Grody, MD, PhD, Program Director, Molecular Genetic Pathology, Department of Pathology & Laboratory Medicine, 10833 Le Conte Ave., Rm: 13-145G CHS, Los Angeles, CA 90095-1732. (310) 825-5648. Address inquiries to: Annetta Pierro, Fellowship Education Coordinator, David Geffen School of Medicine, UCLA, Pathology & Laboratory Medicine, 10833 Le Conte Ave, Room: 13-145G CHS, Los Angeles, CA 90025
