Re: ICPI Trainee Travel Award

Dear Dr. Sobel and ICPI Board,

I wish to sincerely thank you for the opportunity to attend the CAP '07 meeting in Chicago. The ICPI Trainee Travel Award is a wonderful way to help residents access valuable education and experiences beyond the normal curriculum. As such, I commend the ICPI for its commitment to resident education and development.

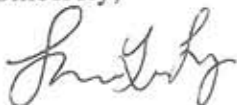

The CAP '07 meeting in Chicago exceeded my expectations in so many ways. I was delighted to participate in the Resident's Forum as a first time attendee. The flow and exchange of ideas that took place during the forum assured me that the future of pathology is both bright and exciting. I was also pleased to learn more about the inner workings of the CAP and realized the importance of being involved in a professional organization.

The meeting offered tremendous opportunities to meet colleagues and new friends in the same specialty. By sharing my experiences as a pathology resident in Canada and learning more about programs elsewhere, I gained valuable insight into my own residency program and the way pathology is practiced in Canada. Equipped with this knowledge, I hope to be able to offer a different perspective in my future work.

Finally, this report would not be complete without mentioning the excellent courses at the meeting. The course topics were relevant and well chosen while the caliber of teaching was outstanding. The courses specifically recommended for residents were particularly helpful in building and solidifying knowledge.

In closing, I wish to thank you again for your support. The CAP '07 meeting was a very rewarding experience for me. I hope with your ongoing support, other residents will be able to benefit in a similar manner.

Sincerely,

Dr. Thai Yen Ly
