

Dear Dr Sobel,

I would like to thank you and the ICPI Board for support me to attending the 2009 AMP annual meeting in form of the ICPI Training Travel Award. It was great honor to be recognized at the 2009 AMP meeting.

I enjoyed the entire meeting very much. Through this meeting, I am convinced that I made a right choice for choosing molecular pathology as my lifetime medical career. I have learned a lot from this meeting and witness the fastest growing trend in molecular diagnostic pathology. I think the most benefit from this meeting I have learned is the KRAS mutation detection studies which is the project I am currently doing during my MGP fellowship training at VCU. I have submitted an abstract in early October and will present my study at USCAP meeting in Washington, DC next March.

Thank you very much for your support. I think the future pathology is the molecular and I will encourage more my fellow pathology residents to get into this important and fast growing field.

Sincerely

Ning Chen, M.D., Ph.D.
