

Personal Statement

As a trainee member of American Society for Investigative Pathology, I submitted an abstract to 2011 Annual Meeting at Experimental Biology last December, because it's such a great opportunity for me to present my work, discuss with other attendees, and get valuable lead. Unfortunately, my supervisor's grant application got rejected this February. Because of his funding problem, I would be otherwise unable to attend the meeting without the support from ICPI Travel Award. Finally, my presentation went very well on the meeting.
