Intersociety Council for Pathology Information (ICPI)

9650 Rockville Pike  
Bethesda, MD 20814

Dear members of the ICPI,

I would like to greatly appreciate the Intersociety Council for Pathology Information (ICPI) for the support for me to attend the 60<sup>th</sup> Annual Scientific Meeting of American Society of Cytopathology (ASC) in Las Vegas, NV from Nov 2-Nov6.

This year's American Society of Cytopathology annual meeting was a wonderful and productive event, which broadened my knowledge of cytopathology, expanded my research interests and allowed me to meet with experts in the field. My attendance at this great meeting would not be possible without the generosity of the ICPI. During the meeting, I have the chance to learn new concepts and challenging cases from the panel discussion and video microscopy demonstration. My interest in cytopathology grew dramatically after talking with pioneers and peer fellows. I am particularly interested to see the new roles of the cytopathologist as an interventionalist and direct caregiver clinically. Another highlight of the meeting was the celebration of the 60<sup>th</sup> anniversary of the ASC which involved many exciting activities. I also presented my abstract, entitled "Correlation discrepancies between High-Grade Squamous Intraepithelial Lesions (HSIL) and High-Grade Cervical Intraepithelial Neoplasia (CIN 2/3): A Cytological / Histological Correlation Study" as a poster presentation during the meeting. Many attendees were interested in my research projects and gave me constructive suggestions for my future research direction.

I am looking forward to pursue my fellowship training in cytopathology in near future and my long term career goal is to be a academic cytopathologist. Attending the ASC meeting tremendously has helped me to realize my career goal.

Thank you very much

Ming Zhang, M.D., Ph.D.
