Dear ICPI award committee members,

Thank you so much for providing me ICPI trainee travel award to attend Experimental Biology 2014 annual meeting. I had an oral presentation as well as a poster in ASIP liver sessions. It was a good learning experience for me to give an oral presentation in a national meeting. I had very fruitful discussions related to my work and received very useful feedback which will help me to plan my future studies. Further, I learned a lot from other presentations and posters in the meeting which gave me some interesting ideas to pursue further and apply to my work. This meeting also provided me opportunity to know and interact with some leading scientists in my field, an experience so important for budding scientists. I am sure that attending this meeting will contribute to my career development. Thank you again for your support.

Sincerely,  
Bharat Bhushan, MS
