Intersociety Council for Pathology Information
9650 Rockville Pike
Bethesda, MD 20814-3993

Dear ICPI Board,

I am very grateful for the support that I received from ICPI that allowed me to attend the 2017 Association of Pathology Chairs (APC/PRODS) meeting in Washington, DC.

As the APC appointed delegate to the Organization of Resident Representatives, a constituent branch of the AAMC, I was invited to speak at the APC/PRODS meeting to give the annual progress report regarding the activities of this committee and their implications for pathology GME. This year marked major changes to the common program requirements from the ACGME, so it was valuable to be able to discuss this from a resident perspective. The APC meeting also had many other excellent opportunities for learning and career development, on topics ranging from feedback, entrustable progression activities, diversity, and informatics.

I am very grateful for the many ways that ICPI supports pathology trainees and promotes pathology as a career. It is a privilege to have been the recipient of this grant.

Sincerely,

Margaret L. Compton, MD
Chief Resident
