2016 Travel Award Application.

Dear ICPI,

I would like to express my gratitude and thank you for giving me an opportunity to attend 2016 American Association of Neuropathologist meet. This grant enabled me to present our case of Glioneuronal Tumor with Neuropil Islands (GTNI) at the upcoming American Association of Neuropathologist conference. So far, there are only 35 reported cases that include reports and reviews of lesions with both glial and neuropil rich islands. Our poster discussed ATRX mutations observed in the neuropil rich islands, which have not been previously reported in these tumors. These findings suggest a divergent differentiation early on in tumor genesis based on the current understanding of CNS tumor genesis.

I also had opportunity to attend the lectures to learn about the recent changes in WHO Classification of Central Nervous System tumors (2016).

I thank you again for providing me an opportunity to present and pursue my pathology research.

Regards,

Avneesh Gupta, M.D.
